

Stewart

Stewart

Stewart is a UK manufacturer and market leader in rotational and injection moulded products. We have expertise across a wide range of industry sectors including aerospace, automotive, medical, technical moulding, garden, home and catering. Products manufactured by Stewart include pots, propagators, food containers and specialist storage products.

Two specialist divisions, Stewart Technical and Stewart Packaging, provide bespoke technical moulding and packaging expertise and services to the aerospace, automotive, medical and other manufacturing industries.

We employ 100 people at its purpose-built 178,000 sq ft facility in Banbury, Oxfordshire. The Fully Automated factory is home to micro controlled machines, including several Engle 300 machines and an Engle 700 machine, giving us enviable large machine capacity and fast manufacturing cycles. Stewart operates 24 Hours, five days a week. The factory has an extensive warehouse and can offer sub-assembly and printing. We also have strong links with offshore tool making facilities, enabling you to benefit from a world class manufacturing service and significant time and cost savings.

Non Executive

Ian Stuart	Chairman of the Board
Ken Lindsay	Director
Eleanor Blagbrough	Alternate Director

Quality Commitment

Our raw materials are sourced from approved suppliers and independent testing is carried out on relevant materials, components and finished products to ensure safety and compliance. We are able to operate within specified hygiene and technical parameters, as appropriate.

Corporate Responsibility

Good governance for us means promoting the success of the Company taking into account:

- The interests of our employees
- The impact of our operations on the community and the environment
- The desire for strong, professional relationships with customers, suppliers and others in our industry
- The protection of our reputation for high standards of business conduct
- An absolute commitment to work within the Bribery act.
- The intent to act fairly in business relations
- The likely long term consequences of decisions made

The Company recognises that its responsibilities extend beyond financial results and related matters. Effective management of health and safety, environmental, ethical and social risks is fundamental to our duty of care to our stakeholders, as well as being important to our corporate reputation and profitability.

We will comply with current legislation, labour protection, health and safety and environmental regulations as well as regulations applicable to our own industry and to those of our customers, always seeking to improve where possible.

Integrated Management System

We operate an IMS comprising health and safety, environment and quality divisions:

Health & Safety

We have a robust health and safety system companywide and provide training and instruction to all our employees to ensure high standards are maintained. Our system is written to comply with OHSAS 18001 and we are actively working towards this certification.

As a Company we are aware of the international social standard SA 8000 and endeavour to ensure that we keep within that guidance.

Environment

The Company is mindful of the environmental impacts of our operations and activities. Our system is written to comply with ISO 14001 and we are actively working towards this certification.

Quality

Our high quality standards are well known to our customers both nationally and internationally. We are certified to BS ISO 9001-2001 and have been so for many years.

We are currently working towards achieving certification to TS16949 the automotive standard; at level 1 currently we are on target to achieve stage 2 in 2013.
